

By the end of Year 4, it is expected that every child will know all of their times tables from 1x1 up to 12x12.

When completing each challenge, we allow for a small number of errors and this will not prevent the children from moving on.

In most cases, children will need to pass their specific challenge on 2 consecutive occasions before they move on to the next stage.

Once children have completed the entire age appropriate stage, they will not continue on to the next stage, but instead may be asked to:

- repeat the final challenge in a shorter amount of time
- increase the number of questions answered in the 5 minute time slot - in line with the final challenge.
- answer missing number sentences - in line with the final stage. E.g.
 - (Bronze Stage): $2 \times \square = 12$, $40 \div \square = 10$
 - (Silver Stage): $3 \times \square = 21$, $24 \div \square = 4$

Please support your child by practicing the times tables in their current stage daily. This can be done through regular recall, times table charts, games and songs.

TIMES TABLES

at

Brookfield Junior School

Year 2: Bronze

- Challenge 1: Recall multiplication facts 2 times tables.
- Challenge 2: Recall division facts 2 times tables.
- Challenge 3: Recall multiplication facts 10 times tables.
- Challenge 4: Recall division facts 10 times tables.
- Challenge 5: Recall multiplication facts 5 times tables.
- Challenge 6: Recall division facts 5 times tables.
- Challenge 7: Recall multiplication and division facts for 2, 5 and 10 times tables.

Year 3: Silver

- Challenge 1: Recall multiplication facts 3 times tables.
- Challenge 2: Recall division facts 3 times tables.
- Challenge 3: Recall multiplication facts 4 times tables.
- Challenge 4: Recall division facts 4 times tables.
- Challenge 5: Recall multiplication facts 8 times tables.
- Challenge 6: Recall division facts 8 times tables.
- Challenge 7: Recall multiplication and division facts for 3, 4 and 8 times tables.

Year 4: Gold

- Challenge 1: Recall multiplication facts 6 times tables.
- Challenge 2: Recall division facts 6 times tables.
- Challenge 3: Recall multiplication facts 7 times tables.
- Challenge 4: Recall division facts 7 times tables.
- Challenge 5: Recall multiplication facts 9 times tables.
- Challenge 6: Recall division facts 9 times tables.

- Challenge 7: Recall multiplication facts 11 times tables.
- Challenge 8: Recall division facts 11 times tables.
- Challenge 9: Recall multiplication facts 12 times tables.
- Challenge 10: Recall division facts 12 times tables.
- Challenge 11: Recall multiplication and division facts for 6, 7, 9, 11 and 12 times tables.

Year 5: Platinum

- Challenge 1: Use known multiplication facts to multiply by multiples of 10, 100, 1000.
- Challenge 2: Use known division facts to divide multiples 10, 100, 1000.
- Challenge 3: Use known facts to multiply with larger numbers.
- Challenge 4: Use known facts to divide larger numbers.
- Challenge 5: Using known facts to divide and multiply by larger numbers.

Year 6: Diamond

- Challenge 1: Use known facts to multiply with decimals.
- Challenge 2: Use known facts to divide with whole numbers and decimals.
- Challenge 3: Using known facts to divide and multiply including decimals.
